

2020-2021 Training Calendar Home Modifications Course

CPPACC4020A and CPPACC5016A are accredited units. The course aims to expand the knowledge of Allied Health professionals, builders, building consultants/designers to have requisite skills and knowledge to create/modify existing private dwellings to suit the specific needs of the client, and where appropriate, family and/or carers. We now offer this course online and provide the same great quality training and outcomes as we do in our face-to-face sessions.

If your organisation has more than 20 trainees and is looking at different training dates, please email training@at-aust.org or call 02-99125800, to discuss how *we can tailor a package for you*.
