First it presents a brief review of existing MHD models in studying solar corona and the heliosphere. Then it introduces the cell centered FVM in three dimensional computational domain. Finally the book presents some applications of FVM to the MHD codes on spherical coordinates in various research fields of space weather focusing on the development of the 3D Solar InterPlanetary space time Conservation Element and Solution Element SIP CESE MHD model and its applications to space weather studies in various aspects. The book is written for senior undergraduates, graduate students, lecturers, engineers and researchers in solar terrestrial physics, space weather theory, modeling and prediction, computational fluid dynamics and MHD simulations.
