Hopeful, eloquent, and bold, *Ecoliterate* offers inspiring stories, practical guidance, and an exciting new model of education that builds in vitally important ways on the success of social and emotional learning by addressing today's most important ecological issues. This book shares stories of pioneering educators, students, and activists engaged in issues related to food, water, oil, and coal in communities from the mountains of Appalachia to a small village in the Arctic, the deserts of New Mexico to the coast of New Orleans, and the streets of Oakland, California to the hills of South Carolina. *Ecoliterate* marks a rich collaboration between Daniel Goleman and the Center for Ecoliteracy, an organization best known for its pioneering work with school gardens, school lunches, and integrating ecological principles and sustainability into school curricula. For nearly twenty years, the Center has worked with schools and organizations in more than 400 communities across the United States and numerous other countries. *Ecoliterate* also presents five core practices of emotionally and socially engaged ecoliteracy and a professional development guide.     **A Dance with the Fae Prince** Elise Kova, 2023-10-19 Inspired by the tales of Cinderella as well as Psyche and Eros, *A Dance with the Fae Prince* is perfect for fans of *A Court of Silver Flames* and *An Enchantment of Ravens*, featuring a slow-burn romance and sizzling steaminess.     Bokinfo     [The Chicago Guide to Writing about Multivariate Analysis, Second Edition](#) Jane E. Miller, 2013-09-26 Many different people, from social scientists to government agencies to business professionals, depend on the results of multivariate models to inform their decisions. Researchers use these advanced statistical techniques to analyze relationships among multiple variables, such as how exercise and weight relate to the risk of heart disease or how unemployment and interest rates affect economic growth. Yet despite the widespread need to plainly and effectively explain the results of multivariate analyses to varied audiences, few are properly taught this critical skill. *The Chicago Guide to Writing about Multivariate Analysis* is the book researchers turn to when looking for guidance on how to clearly present statistical results and break through the jargon that often clouds writing about applications of statistical analysis. This new edition features even more topics and real-world examples, making it the must-have resource for anyone who needs to communicate complex research results. For this second edition, Jane E. Miller includes four new chapters that cover writing about interactions, writing about event history analysis, writing about multilevel models, and the Goldilocks principle for choosing the right size contrast for interpreting results for different variables. In addition, she has updated or added numerous examples while retaining her clear voice and focus on writers thinking critically about their intended audience and objective. Online podcasts, templates, and an updated study guide will help readers apply skills from the book to their own projects and courses. This continues to be the only book that brings together all of the steps involved in communicating findings based on multivariate analysis: finding data, creating variables, estimating statistical models, calculating overall effects, organizing ideas, designing tables and charts, and writing prose in a single volume. When aligned with Miller's twelve fundamental principles for quantitative writing, this

approach will empower readers whether students or experienced researchers to communicate their findings clearly and effectively
