Understanding Options for Agricultural Production G.Y. Tsuji,G. Hoogenboom,P.K. Thornton,2013-03-14 The first premise of this book is that farmers need access to options for improving their situation In agricultural terms these options might be management alternatives or different crops to grow that can stabilize or increase household income that reduce soil degradation and dependence on off farm inputs or that exploit local market opportunities Farmers need a facilitating environment in which affordable credit is available if needed in which policies are conducive to judicious management of natural resources and in which costs and prices of production are stable Another key ingredient of this facilitating environment is information an understanding of which options are viable how these operate at the farm level and what their impact may be on the things that farmers perceive as being important The second premise is that systems analysis and simulation have an important role to play in fostering this understanding of options traditional field experimentation being time consuming and costly This book summarizes the activities of the International Benchmark Sites Network for Agrotechnology Transfer IBSNAT project an international initiative funded by the United States Agency for International Development USAID IBSNAT was an attempt to demonstrate the effectiveness of understanding options through systems analysis and simulation for the ultimate benefit of farm households in the tropics and subtropics The idea for the book was first suggested at one of the last IBSNAT group meetings held at the University of Hawaii in 1993

Addiction Gene M. Heyman,2010-10-15 In a book sure to inspire controversy Gene Heyman argues that conventional wisdom about addiction

that it is a disease a compulsion beyond conscious control is wrong Drawing on psychiatric epidemiology addicts autobiographies treatment studies and advances in behavioral economics Heyman makes a powerful case that addiction is voluntary He shows that drug use like all choices is influenced by preferences and goals But just as there are successful dieters there are successful ex addicts In fact addiction is the psychiatric disorder with the highest rate of recovery But what ends an addiction At the heart of Heyman s analysis is a startling view of choice and motivation that applies to all choices not just the choice to use drugs The conditions that promote quitting a drug addiction include new information cultural values and of course the costs and benefits of further drug use Most of us avoid becoming drug dependent not because we are especially rational but because we loathe the idea of being an addict Heyman s analysis of well established but frequently ignored research leads to unexpected insights into how we make choices from obesity to McMansionization all rooted in our deep seated tendency to consume too much of whatever we like best As wealth increases and technology advances the dilemma posed by addictive drugs spreads to new products However this remarkable and radical book points to a solution If drug addicts typically beat addiction then non addicts can learn to control their natural tendency to take too much
