Popular Science ,1931-08 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better 1931 Tobias Straumann,2019-01-08 Germany s financial collapse in the summer of 1931 was one of the biggest economic catastrophes of modern history It led to a global panic brought down the international monetary system and turned a worldwide recession into a prolonged depression The crisis also contributed decisively to the rise of Hitler Within little more than a year of its onset the Nazis were Germany s largest political party at both the regional and national level paving the way for Hitler s eventual seizure of power in January 1933 The origins of the collapse lay in Germany s large pile of foreign debt denominated in gold backed currencies which condemned the German government to cut spending raise taxes and lower wages in the middle of a worldwide recession As political resistance to this policy of austerity grew the German government began to question its debt obligations prompting foreign investors to panic and sell their German assets The resulting currency crisis led to the failure of the already weakened banking system and a partial sovereign default Hitler managed to profit from the crisis because he had been the most vocal critic of the reparation regime responsible for the lion s share of German debts As the financial system collapsed his relentless attacks against foreign creditors and the alleged complicity of the German government resonated more than ever with the electorate The ruling parties that were responsible for the situation lost their credibility and became defenceless in the face of his onslaught against an establishment allegedly selling the country out to her foreign creditors Meanwhile these creditors hesitated too long to take the wind out of Hitler s sails by offering debt relief In this way a financial crisis soon developed into a political catastrophe for both Europe and the world *Popular Mechanics* ,1931-08 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Popular Mechanics** ,1931-03 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Popular Mechanics** ,1931-02 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Popular Mechanics** ,1931-05 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Popular**

Christopher Jespersen,1999-02-01 In the 1930 s and 1940 s the prevalent American view of China was that of a friendly democratic and increasingly Christian state in many ways akin to the United States This view was fostered by a wide range of literary political and business leaders including Pearl S Buck Franklin D Roosevelt Wendell Willkie Joseph Stillwell Claire Chennault and most notably the powerful publisher of Life and Time Henry R Luce This book shows how the notion of the Chinese as aspiring Americans helped shape American opinions and policies toward Asia for almost twenty years This notion derived less from the reality of Chinese historical or cultural similarities than from a projection of American values and culture in the American view fueled by various political economic and religious interests China was less a geographical entity than a symbol of American hopes and fears One of the more important consequences was the idealization of China and the demonization of Japan **The Credit-Anstalt Crisis of 1931** Aurel Schubert,1991 Shubert analyses the impact of the Austrian 1931 financial crisis on Europe and the Great Depression by analysing it using theories of financial crises identifying the causes of the crisis and examining the market s efficiency in predicting events He also analyses how the crisis was transmitted to the real sector and studies the behaviour of the Austrian as well as international authorities
